EXECUTIVE SUMMARY

LatinTech Was an Incredible Success

This inaugural LatinTech Accelerator was an incredible success, starting with the moment it was announced. As anticipated, the Tampa Latin community fully welcomed the tech founders and lent their expertise in many ways, from event hosting to being Advisory Council members. Accenture hosted a fireside chat luncheon during Global Entrepreneur Week and the City of Clearwater hosted the founders at a luncheon and tour post event. Now Publishing published a collection of personal stories from our Latin startup founders.

This Accelerator attracted the attention of the Miami tech ecosystem and exploratory conversations are underway for a potential future collaboration. National brands also took notice and exploratory conversations are in process about funding supporting a second Accelerator in 2025.

The Welcome Reception was hosted in Tampa's Ybor City Latin Quarter, with business owners, politicians, dignitaries and Gasparilla Pirate Krewe, the Knights of Sant Yago, adding beads, color and history. Congresswoman Kathy Castor and Mayor Jane Castor both provided welcoming remarks and the media featured stories about the Accelerator. Several founders have gone on to present at major conferences, including Christy Cull-Fernandez, who was a panelist for Enterprising Latinas to encourage local Latinas to start their own businesses; she will be a panelist in October on the topic of AI (Artificial Intelligence) at the University of South Florida Women in Leadership & Philanthropy Annual Symposium.

The inaugural cohort included 17 founders representing 15 tech startups recruited from across the US and beyond. More than 180 startups applied, with many referred from Wave ecosystem and network members, including alumni companies. Details are provided on the following pages and this [LatinTech web page link](#) showcases sponsors and Advisory Council members. Photos and success stories are also included herein.

As a nonprofit 501(c)(3), Wave takes zero equity from the participating companies. This Accelerator was fully funded by the generous support of the US Economic Development Agency through the Small Business Administration. The 15 startups participated in a multi-week intensive program that included dedicated mentors, one-on-one coaching with notable tech founders, sales training, pitch coaching and investor introductions in an environment designed to support high-scale growth. Beyond the program, the participating companies enjoy ongoing support through Tampa Bay Wave's connections and access to further accelerate company development.

As of this report, collectively, over 500 hours of mentoring and other support have been provided to these companies, as well as invaluable exposure opportunities through press, social media and Wave's signature events that showcased this cohort. Capital raised aggregated \$9.3 Million with 183 new jobs.

Tampa Bay Wave was honored to host this inaugural Accelerator and looks forward to LatinTech 2.0.

Linda Olson
CEO, Tampa Bay Wave

LatinTech 2023 Accelerator

Allergood

Company Name: Allergood
Description: Allergood, a first-generation, Latina-owned B2B tech solution, swiftly filters food service menus for allergens and dietary preferences, providing safe options
Location: Durham, NC, USA
Founder(s): Michelle Addison
Website: allergood.com

Company Name: Ancestral Tech
Description: Maximize agricultural projections with our technology focusing on precision agronomy, enabling the detection and correction of issues in dense spaces, such as intensive agriculture, targeting desert regions and future space agriculture development.
Location: Arica, Chile
Founder(s): Patricio Arias
Website: ancestraltech.com

Company Name: COCO Digital
Description: COCO Technologies leads a transformative healthcare movement across Latin America, prioritizing life-saving solutions and enhancing healthcare procedures, influencing major markets and preventing over 20,000 annual premature deaths in 2022.
Location: Colombia
Founder(s): Robert Zuluaga
Website: cocodigital.co

Company Name: Davinci Wearables
Description: A wearable health and wellness platform for active females, offering a proprietary liner, a user-friendly app that syncs data with 3rd-party tools, and tailored sport-specific recommendations for peak performance, preferences, providing safe options
Location: Sunnyvale, CA, USA
Founder(s): Christy Fernandez-Cull
Website: davinciwearables.com

Company Name: H+Trace
Description: AI platform enhancing healthcare and food and beverage supply chains, delivering high-quality data for actionable logistics insights and decision-making improvements.
Location: Miami, FL, USA
Founder(s): Javier Cuello
Website: h-trace.com

Company Name: Hitch
Description: An end-to-end HR SaaS utilizing advanced technology for autonomous recruitment, offering a self-service platform with intelligent video interviews and gamified cognitive skill assessments without human contact.
Location: Mexico City, CDMX, Mexico
Founder(s): Daniel Pardo Salazar and José Miguel Arreola
Website: hello.gethitch.ai

Company Name: Keybe
Description: Keybe is a B2B SaaS leveraging Gen AI to optimize sales conversions and minimize response times by consolidating customer data and enabling scaled-assisted sales through text channels.
Location: Miami, FL, USA
Founder(s): Samuel Urquijo
Website: keybe.ai

MissBerni

Company Name: Miss Berni
Description: Miss Berni is a "Teacher Hunter" who recruits Latin American teachers for schools in the United States.
Location: Santiago, Chile
Founder(s): Ismael Villanueva
Website: missberni.com

Company Name: Nufi
Description: Nufi streamlines Mexico's background checks, offering swift, affordable identity verification for businesses, enhancing trust and compliance with an AI tech-driven approach.
Location: Monterrey, Nuevo Leon, Mexico
Founder(s): Hans Villa and Ilch Nunez
Website: nufi.mx

Company Name: OTIF
Description: Revolutionizing supply chain visibility and integration with OTIF—an all-in-one platform enabling automatic quoting, booking, and tracking of logistics services across various supply chains.
Location: Monterrey, Nuevo Leon, Mexico
Founder(s): Pamela Villarreal
Website: otif.mx

Company Name: Prosal
Description: Prosal is a B2B SaaS platform that helps agencies and consultants find and win requests for proposals.
Location: Miami, FL, USA
Founder(s): Nick Lopez and Alfredo Ramirez
Website: prosal.io

Company Name: TELL
Description: TELL provides an AI-driven speech analysis technology for comprehensive brain health assessments, offering scalable, personalized, reliable, and accessible insights to empower individuals, healthcare experts, and pharmaceutical research for enhanced brain health monitoring and optimization.
Location: Montevideo Department, Uruguay
Founder(s): Fernando Johann and Adolfo Garcia
Website: tellapp.org

Company Name: Videomart
Description: Videomart is the only blockchain-powered video-on-demand marketplace designed to disrupt Hollywood by giving users the ability to buy an sell their digital movies and filmmakers a better ROI.
Location: Los Angeles, CA, USA
Founder(s): Moisés Zamora
Website: videomart.club

WAS Co.
WORLDWIDE
ACCOUNTABILITY
SOLUTIONS

Company Name: WAS CO
Description: Specializes in innovative, sustainable building materials, transforming plastic, construction, and mining waste into materials that meet environmental goals, offering low-emission, high-quality, and cost-effective solutions for the mining and cement industries.
Location: Monterrey, Nuevo Leon, Mexico
Founder(s): Walter Daniel Mata
Website: wascompany.com

Company Name: Zaia
Description: We are building a world class no-code platform that empowers companies to infuse Generative AI into their sales and customer support workflows, allowing them to focus on strategic challenges instead of boring operational ones
Location: São Paulo, State of São Paulo, Brazil

PROGRAMMING ACTIVITIES SUMMARY

The 15 LatinTech cohort companies had access to **over 500 hours** of mentoring and other support including 70 workshops and training sessions utilizing an incredible line-up of expert speakers. Startup founders also benefited from numerous 1:1 mentoring and coaching hours with members of Wave's Staff and with our 200+ Mentor Network of professionals who donate their time and expertise.

Three signature events were hosted for the 17 founders, supplemented by four community visibility events:

- 1) Pre-Launch Announcement
- 2) Welcome Reception
- 3) Global Entrepreneurship Week Fireside Chat
- 4) Demo Day
- 5) Latin Founder Stories Book Launch
- 6) Pitch Night and Concluding Reception
- 7) City of Clearwater Luncheon

Featured Speakers

● Venture Capital

- Danyell Jones, Raymond James
- Kristopher Lancaster, Deepwork Capital
- Brian Neer, Neer Venture Partners
- Scotty L, Las Olas Ventures
- Ryan Whittemore, Florida Funders
- Brian Mongeau, First In
- Andreas Calabrese, TampaBay.Ventures
- Joe Panettieri, Channel Angels
- Scott Lopano, Tech Square Ventures

● Industry Experts & Founders/Alumni

- Cesar Hernandez, Omni Public
- Nathan Beckord, Founder, FounderSuite
- Maria Burbridge, Bochner PLLC
- Katerina Barquet, Barquet Stege Immigration Law
- Juan Barrero, Lazo (Alumni)
- Max Echeverria, Eskuad (Alumni)
- René Espinoza Jimenez, Lazarillo (Alumni)
- Rocio Vitale, Improving Aviation (Alumni)
- Erik Maltais, Immertec (Alumni)
- Reid Buchanan, Trenam Law
- Marcus Herring, GoGlobal
- Sam Li, Thoropass

- Key Leadership Skills for Growth
- Avoiding Burnout

RECRUITMENT & SELECTION

Successful 1st Year Program

Since Tampa Bay Wave launched its downtown Tampa venture center and accelerator programming in 2013, our region's technology sector has seen transformative change. In just ten short years, the local ecosystem is hardly recognizable as the region regularly boasts about its startups getting national and global attention. With 2023 marking the inaugural year of the LatinTech Accelerator program, Tampa Bay Wave is excited about the fresh perspectives and opportunities this new initiative offers. As a first-year program, LatinTech offers unique benefits, allowing Wave to tap into a vibrant and growing Latin-heritage tech community that brings diverse ideas to Tampa Bay. The program's newness provides flexibility to adapt based on real-time feedback, ensuring it meets the specific needs of Latin-heritage entrepreneurs while establishing strong connections between Tampa Bay and Latin-based tech ecosystems.

Key Recruiting Metrics

- 349 Total Applications received
- 78% of applications from outside Florida
- 60% of applications from outside the US
- 57 Semi-Finalists selected from initial screenings
- 15 Companies selected for the cohort

Recruiting Efforts

Wave staff leveraged their extensive national and international network of partners, as well as various media channels, to raise awareness about the program.

- Global and national recruiting partners involved included: Morrow (GAN.co), Gust, F6s, Global Entrepreneurship Network, Startup Champions Network, and others.
- Referrals were received through Wave startups and founder connections, including alumni from past programs and members of other Wave accelerator programs.
- Referrals were also obtained from Mentor and Advisory networks associated with Wave.
- Investor networks provided additional referrals.
- Sponsors and Donors contributed referrals as well.
- Community partner referrals and connections were utilized.
- Cold inbound leads were another source of applicants.
- A combination of paid digital advertising campaigns, email marketing, and social media outreach was employed.

Year-Round Recruiting Impact

The LatinTech Accelerator benefitted from nearly a full-year of recruiting. The importance of **year-round recruiting** cannot be understated because as the accelerator industry knows... the startups choose the program, not the other way around. Wave's reputation as "best in class" ensures top quality applicants bringing viable real world solutions to market.

The most market mature cohort in Tampa Bay Wave history

The LatinTech cohort had several experienced serial entrepreneurs, many boasting prior exits (company sales). Combined, the group reflected over **100 years of experience**, some engaged since the dawn of the industry. They also had **collectively raised over \$30 million dollars** prior to entering the program, evidencing the investment market's positive reaction to their offerings.

Continued Success in Recruiting International Startups

The LatinTech cohort ultimately featured 9 international startups, with applications across the globe. Utilizing international partnerships, particularly, Pro Chile, Wave was able to extend its reach and advance West Central Florida as a valuable emerging tech hub visible globally. Wave's accreditation from Morrow makes Wave top 100 in the world.

Focused on Expanding Jobs in the US

This cohort has already expanded their teams and added well-paying tech jobs in the US, further advancing and drawing attention to the developing tech ecosystem here. We look forward to upcoming metrics collection periods to monitor those expansions.

"We're filmmakers, Wave's program helped us build our organizational structure to launch our product, introduced us to capital sources, connected us to hire a growth-focused CEO (job add), and positioned us for our media/marketing strategy. Best of all, we met 14 other great founders and are now part of a valuable startup community."

Moises Zamora
CoFounder - Videomart

THANK YOU ADVISORY COUNCIL

A special thank you to our LatinTech Accelerator Advisory Council!

The council united experts from the region to empower startups across public, private, and government sectors. Its members shared the journey of startup founders, often with relatable backgrounds and heritages. This extraordinary gathering of influence and expertise is truly valued for their selfless dedication of time and talents.

MAKING BIG WAVES

The first half of 2024 reflects even more success for delivery on Tampa Bay Wave's mission as we continue to deliver Accelerations focused on: CyberTech, FinTech, HealthTech and Tech Diversity. The second half will be filled with even more action, as we add a new bluetech accelerator focused on supporting ocean resiliency thanks to new funding from NOAA. We continue to grow our portfolio of startups as we add new verticals. We are committed to supporting talented founders and enhancing the reputations of our region and state as an innovation tech hub.

Wave has continued to expand its reach and delivery across the region and beyond, tapping both its Tampa headquarters and a satellite office opened in downtown St. Petersburg. Our formal and informal partnerships within our community continue to expand. Our joint pursuit of funding through a partnership with the University of South Florida is just one example of how we collaborate to enhance this region's tech reputation, bringing talent and exposure here

We anticipate 2024 will prove even more amazing, thanks to all who support us. Securing multi-year funding allows us to build upon the work of the prior year, which is critical to long-running programming.

Wave continues to expand its networks and looks forward to celebrating success at our December Hall of Fame Awards Celebration event.

INVESTOR & CUSTOMER NETWORKS

Wave's Investor Network

Wave has built a deep network of local investors and mentors, including several former Wave alumni founders who have sold their companies in recent years. Wave also has a strong relationship with various co-investor targets in Florida including DeepWork Capital, Tampa Bay Ventures and Florida Funders, to name just a few. More are shown in the logos below. Here is the [link](#) to the Investor page on Wave's website for more information; some are depicted in the Pillars of Innovation section for their support across programs; Tampa Bay Ventures has specified its contribution for investor readiness.

In all, Wave member companies have access to a 500+ network of investors known to make investments in early stage startups. DeepWork Capital also runs the Florida Opportunity Fund, which is a huge connection advantage.

Additionally, Wave deploys its unique relationship with PitchBook as a tool and resource to curate matches between its member companies and active investors.

Customer Networking

Wave team members also work their connections to provide introductions to potential customers for our member startups, so that they can build critical customer capital, revenues and profits as part of their business growth success. Below are some examples.

Here are a few ways to engage our Accelerator and CORE Programs to help innovators:

- Volunteer Mentor
- Accredited Investor
- Sponsor or Financial Supporter
- Community Partnerships

EXPANDING CONNECTIONS & REMOVING ECONOMIC BARRIERS

In 2023, Wave reached out to SouthWest Airlines and Delta Air Lines, requesting their help to help remove an economic barrier for cash-strapped startup founders. While Wave's programs are offered at no charge, the founders pay their own travel expenses to and from Tampa plus their lodging costs. We have long enjoyed being able to offer these traveling founders an incredible discount from the Hyatt House/Hyatt Place hotel next door but the cost of airfare was still a challenge for some. We were honored and delighted when both of these airlines offered us vouchers that we can distribute based on financial need to reduce this economic barrier.

And one unanticipated outcome will be the upcoming announcement of additional direct Delta Air Lines flights from Latin countries to Tampa and Orlando, thereby improving the accessibility and travel experience for future founders. We are seeking funding for a repeat of LatinTech in the coming year and look forward to sharing this great news with those applicants.

MENTOR & COMMUNITY PARTNER NETWORKS

Wave's Mentor Network

Wave member companies have access to a wide network of professionals in our 220+ all volunteer Mentor network. These professionals have a passion for helping early stage startups. Some offer their expertise on specific topics (such as HR or trademark laws), while others may coach a startup on an ongoing basis, depending on what support the founder(s) need. We host regular Mentor mixers to build strong trusted relationships.

Here is the [link](#) to the page on Wave's website, showcasing our Mentor network.

Wave's Community Partner Network

Wave has also built a strong community partner network, with both formal and informal agreements in place. We connect our member companies to a wide range of community partners, such as our economic development partners and others who can help our startups build their base in our community.

We also provide introductions to others ESO (entrepreneur support organizations) in the ecosystem to encourage their participation and to magnify their visibility and exposure. Logos from several of our community partners are shown below but may also be found under this [link](#) on our website.

SPONSORS & PARTNERS

Wave's Sponsorships

In the past year, Wave has added national, regional and local sponsors, representing brands with a commitment to supporting diverse and underrepresented founders. Organizations like Delta Airlines and Southwest Airlines have donated flight vouchers to make it possible for Wave founders to travel back and forth and to compete on national and international stages. Corporates have contributed either directly through their business units or through their foundations to underwrite programming and scholarships. The link to that page on Wave's website can be found [here](#).

Wave successfully won federal grants in 2022 through the EDA, the SBA and is competing for more grants in 2023, through the EDA, helping lead a regional consortium that includes academic partners like the University of South Florida, the three surrounding counties of Hillsborough, Pasco and Pinellas plus the City of Tampa and, economic development partners, plus the Port of Tampa, Tampa Airport and so many others.

We are eternally grateful for the support of Congresswoman Kathy Castor, for her advocacy in our securing \$500,000 in funding that launched a LatinTech Accelerator in 4Q23 specifically to support founders of Latin heritage.

Wave has grown its Pillars of Innovation (\$25k+) sponsors as well as all levels of sponsorship support, allowing to expand our programming.
